Bits and bytes by Cassie:

Domestic Abuse is a pattern of coercive, controlling behavior that is a pervasive life-threatening crime affecting people in all communities regardless of gender, age, sexual orientation, race, ethnicity, religion, social standing and immigration status. There are multiple types of domestic abuse; physical, emotional, sexual, financial. Stalking, and harassment. I think domestic violence is wrong and should be reported. Abuse isn't easy to be told; but you should tell someone. In Long Island, a mother of three attempted to kill her husband. She looked up what liquids for cars can kill humans. She began the attempts on September 6th. The Husband spit the foul-tasting beverage out and left with his kids the next day. On September 10th, she slipped into his home and began pouring antifreeze into a Pepsi. This time he called the police and had a camera set up. She came back into the house 2 days later and had her children help her open a wine bottle with two bottles of antifreeze ready to pour. She was caught on camera and lab tests proved it was antifreeze. She is charged with domestic violence and attempted murder.

Polygamy

Polygamy is the practice of having multiple spouses at one time. When a man is married to more than one wife at a time, sociologists call this polygamy. When a woman is married to more than one husband at a time, it is called polyandry. Polygamy is legal for Muslims in India, Malaysia, Philippines, Singapore, South Africa, and Nigeria. Polygamy is only allowed in a small part of Utah in the U.S. Polygamy is illegal in all 50 states. But Utah's law is unique in that a person can be found guilty not just for having two legal marriage licenses, but also for cohabiting with another adult in a marriage like

Cont'd

Relationship when they are legally married to someone else. The FDLS; Fundamentalist of Latter Day Saints, had a compound in Pringle, SD. The group was charged with not having birth certificates or death certificates. The FDLS group is in Colorado City, Arizona. And on the southern border of Utah. A major group in Utah besides the FDLS is the Kingston group. The Kingston Group is charged with multimillion dollar fraud. The Kingston Group has married girls under 15 and some girls were forced to marry cousins and other family members. The Kingston Group has been found neglectful and abusive to children. Three girls have been helping others to escape polygamy and get their lives together outside of the group. I think polygamy is wrong and should not be practiced because it is illegal in the US. Polygamy is neglectful, abusive, and another means of controlling someone.

The Buzz from Taelonna;

Interpretations. The difference between the want and need is shown if you want something you take it selfishly, to own it. The need is to know the appreciation of the thing you feel you needed. But the interpretation that we need anything is careless and selfish to have the position of the love of need. To want for self is not completely wrong, but you need to let go and be interpreted as you are. The interpretation is that we all need something but its just want.

Interpretation- the action of explaining the meaning of something.

Lines from Luigi. Materialism is a tendency to consider material possession and physical comfort as more important than spiritual values. It is also a form of Philosophical monism which holds that matter is the fundamental substance in nature. A banal example of materialism could be valuing a new car over friendships.
